## DOOR & WINDOW SENSOR

# Octagon
## DOOR & WINDOW SENSOR

Octagon is an innovative door and window sensor that detects the open and close status of any door or window, sending real time notifications directly to your smart phone and ensuring complete security of your premises. Features such as scene control and IFTTT allow you to set customised scenes on the Interfree App, so that you are greeted as soon as you open the door.

## Product Features

- Australian Standard Certified
- Easy QR Code installation.
- Complete secured and stable connectivity.
- Easily installable on any surface
- Supports OTA firmware updates.
- Low Power Consumption: Battery life of approx 8 months/700 triggers
- Real Time Battery Status
- Real time notifications of the open/close status of any door or window
- Real time notifications when battery is low
- By using IFTT platform and using open and close status can be used to trigger an automate rule.

## Specification

- Power Source  3V DC Battery
- Battery Type  CR1632
- Battery Life  8-12 months
- Storage Temperature  -20℃ to 60℃
- Standby Power  About 2μA
- Communication Protocol  Zigbee 2.4
